

Taylor Stapleton

case 'n' / case 'p':

I will not be covering this code because frankly its a little cryptic to even understand what these do it would be difficult to generate the c code given the design of my framework

case 'C' / case 'S':

im not entirely sure that these cases are even well defined in the standard and i cant find very much documentation on them. not quite sure how to use them so i will not be covering them.

678 - 689:

ill be honest, i have no idea whats going on here and im not sure what i would additionally need to cover

513-520:

i cant quite figure out how to accurately combine the '.' modifier and the '*' modifier

500 - 503:

i havnt yet found documentation on the '\$' modifier
